

MASTER IN RESEARCH METHODOLOGY (MRM)

DWU Postgraduate & Research Centre

The Master in Research Methodology (MRM) program specializes in research paradigms, methodologies and methods that are relevant across all disciplines. The student's choice of a research problem to investigate influences the Faculty under which they are enrolled.

The MRM program is offered in blended learning mode. Students take two units a semester and complete the program in two and a half or three years. Students are required to participate in a one-week residential component per unit in each semester. Students are expected to have their own personal laptop and reliable internet connectivity.

An optional week O will be offered for all new intakes in semester 1. It is for registration, orientation, skills training in ICT, Moodle Training, academic writing, APA referencing and library skills to prepare students for their academic studies.

Purpose

The MRM Program aims to produce graduates capable of undertaking research using appropriate research methods. Skills gained are idea for students wishing to pursue doctoral studies at a later date.

Facilities

Divine Word University offers excellent, modern, residential, teaching and ICT facilities in a beautiful, friendly and peaceful environment.

Admission requirements

Applicants must normally hold a Bachelor's degree with an average grade of Credit or higher. English writing skills are essential and applicants may also be asked to demonstrate English writing skills before being accepted.

Costs

K100 non-refundable application fee.
K3,500 per unit per semester for tuition, internet access when on campus and supervisory services. A semester comprises 2-3 Units depending.
Current fee for on-campus accommodation and meals is K2,800 per fortnight (K200 per day).
An additional fee of K1,400 is charged for Week O.
Travel, accommodation and meals are additional. An extra fee of K20 per student is charged for each airport shuttle.

Account details for fee payments

Bank	BSP Madang
Branch No.	960
Account No.	1000 433 578
Account Name	TDEC / DWU

Description of Units

Each unit of the Program has a 15 credit point value except the Research Dissertation which has 30 credit points. Students are required to gain 150 credit points to be eligible to graduate with the award.

Unit 1: RM613 Resources for Applied Research in Papua New Guinea

Where does a researcher look for existing baseline resources for research in Papua New Guinea? The unit will introduce students to the 'foundation documents for multi-disciplinary research in PNG. By the end of the unit, students should know where to find background information for any imaginable research topic.

Unit 2: RM610 Theory and Methods for Applied Research

The unit explores key research theories and paradigms to learn which ones are most suitable in particular situations. Students will investigate examples of scientific and social research, including indigenous research, and study a range of qualitative, quantitative and mixed methods research tools and explore the context for their use.

Unit 3: RM603 Crafting the Literature Review

This unit aims to assist students to master the skills in selecting relevant key research literature that will inform their research topics. It is also aimed to assist students to critique significant literature that will inform their research topics and make sense of the discussions presented to them.

Unit 4: RM606 Ethics in Research

This unit introduces students to ethical concepts and/or ethical theories that underpin applied ethical decision making in the areas of research that involve human participation. It also examines the historical and legal context that makes ethics relevant to research today.

Unit 5: RM607 Developing the Research Proposal

The purpose of this unit is to assist candidates to define, plan and develop a research proposal in their respective fields that meets the requirement of the University's Research Ethics Committee.

Unit 6: RM615 Quantitative Research Methods

This unit builds upon the foundations laid in RM610 by focusing on quantitative research approaches, methods and techniques to help students in the choices they make when designing a quantitative study for their research project. The unit exposes students to the main quantitative research approaches and the various methods that can be adopted.

Unit 7: RM614 Qualitative Research Methods

This unit builds upon the foundations laid in RM610 by focusing on qualitative research approaches, methods and techniques. Then unit exposes students to the main qualitative research approaches such as ethnography, action research, phenomenological research, narrative research, grounded theory, and the various methods that can be adopted. The unit also covers instruments for data collection, types of data analysis and ethical considerations when engaging in qualitative research.

Unit 8: RM605 Interpreting and analyzing data

With the data collected during the fieldwork, the emphasis is given to organizing, coding and displaying research data for analysis and interpretation. The students become familiar with different techniques for the qualitative, quantitative and mixed methods of data presentation and analysis.

Unit 9: RM608 The Research Dissertation (30 Credit Points)

In the course of the unit students work closely with their supervisor so that the progress of the research process, data analysis and interpretation are mentored and monitored. The conclusion of this unit is the production and examination of dissertation of a maximum of 20,000 words.
